THE SWAN CONSTELLATION

Once upon a time the swan Marko lived on the Gradišče lake. He was very lonely and his strong desire was to get a family. He was looking for a female partner all around the nearby lakes, but there was not a female swan who would like him. It was beautiful summer afternoon when a pretty female swan appeared on the lake and looked into his sad eyes and realized how good hearted swan he was. They fell in love and got a family of 12 children. They loved each other so much that they soon died. It's only The Swan Constellation that reminds us of their great love story.
